

GOLETA SANITARY

Water Resource Recovery District

Board of Directors:

To: All Visitors,

Steven T. Majoewsky
President

Jerry D. Smith

George W. Emerson

Sharon Rose

Robert O. Wageneck

Steve D. Wagner, PE
General Manager
District Engineer

We want to welcome you to the Goleta Sanitary District's state-of-the-art Water Resource Recovery Facility! This packet contains information related to your tour to ensure your visit is educational, enjoyable, and safe. We are happy to show off our facility, which provides a vital service to over 160,000 members of the public, including the City of Goleta, UCSB, Isla Vista, and the Santa Barbara Municipal Airport.

During the tour you'll see firsthand how we treat wastewater using a multi-step process of physical, biological, and chemical treatment to transform it into high-quality recycled water that is used to irrigate public and commercial landscaping, such as golf courses, school grounds, highway medians, and parks. You'll also learn how we recover energy and nutrients through the process for beneficial use!

The majority of our facility is accessible to everyone. It is an outdoor walking tour, which includes some climbing up and down stairs. If there is anyone in your party with special needs please let us know, we will do our best to accommodate you. If you have any questions, please call Laura Romano, Management Analyst, at 805-967-4519 x.128 or email her at lromano@goletasanitary.org.

We look forward to seeing you soon!

Steve Wagner, P.E.

General Manager/District Engineer
