The Story of an Innovative Approach to Asset Management Planning

**Luis Astorga, Collection Systems Manager, Goleta Sanitary District
Sean Pour, West Coast Asset Management Lead, Hazen & Sawyer
Hansa Keswani, Asset Management Specialist, Hazen & Sawyer**

April 19, 2023

Outline

- Phased Approach (Pilot)
- Data-Driven Approach
- Understanding which assets are critical for sustained performance
- Maximizing Value of Data Collected
- Visualize Data to Maximize Communication with All Levels of Stakeholders

2021

Sewer Collection System Overview

- Service for eastern portion of Goleta Valley
– Santa Barbara City limits to SB
Airport/UCSB
- 132 miles of gravity pipes ranging from 6" to 36" dia sewer
- 75% of pipes are 8" VCP
- 2 lift stations, 2,400 LF total of force main
- 11,250 connections, 80% residential, 100 FSEs, 45,000 population
- System scheduled for cleaning every 3 years, typically completed every 2, CCTV scheduled for 5 years, done 2 x since 2018
- Near zero recurring SSO rate
- CS staff involvement with planning, construction and O&M

CWEA

Challenges of Asset Management

- Perceived as being a long and extensive process
- Understanding the value of Asset Management
 - Buy-in from staff
 - Buy-in from senior management
 - Buy-in from elected officials
- How to prevent it from becoming a snapshot in time vs. a continued process
- How to communicate the results

AC23 CONFERENCE AND EXPO

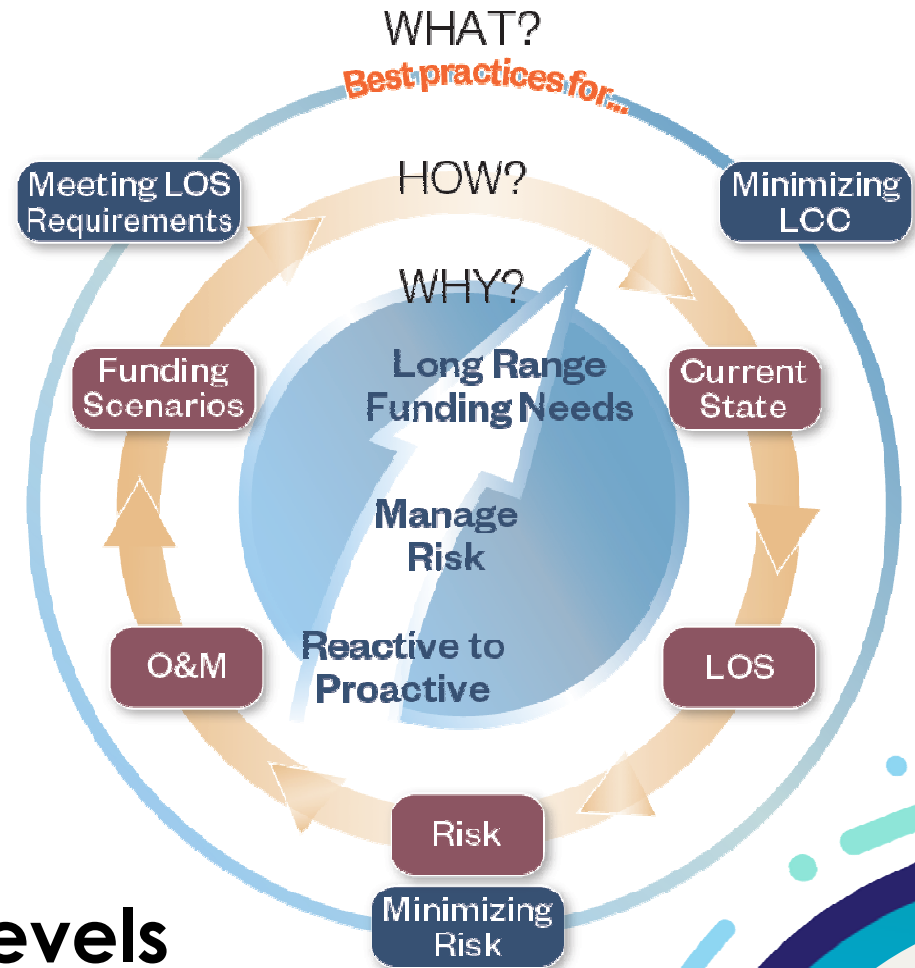

ONE COMMUNITY
ONE PURPOSE

APRIL 18-21, 2023 | SAN DIEGO

CWEA

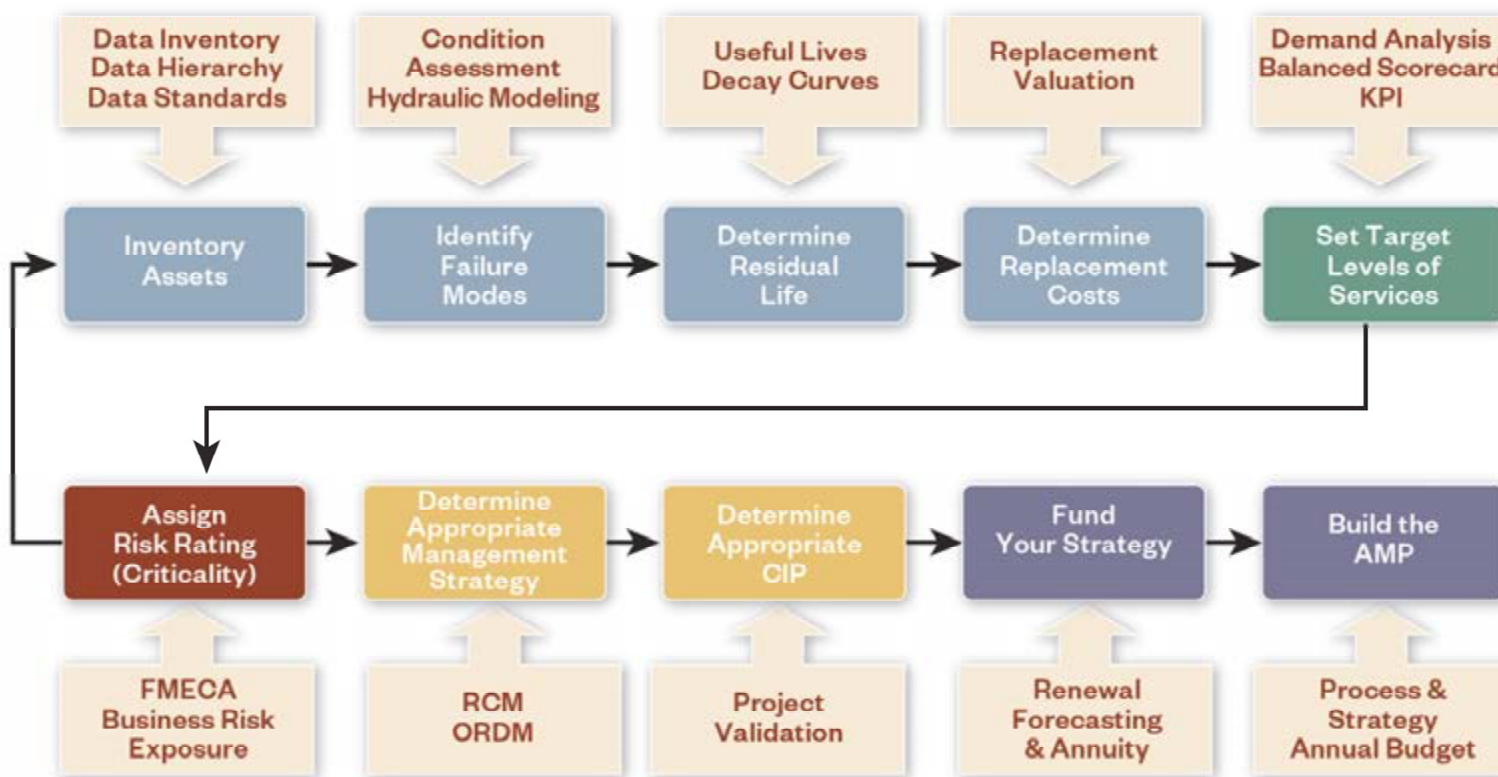

Values of Asset Management is Demonstrated

- What is the current state of my assets?
- What is my required "sustainable" level of service?
- Which assets are critical to sustained performance?
- What are my minimum life-cycle costs?
- What is my best long-term funding strategy?

**Buy-in from all levels
of the organization**

Implement all the steps in a short time-frame

USEPA 10 Steps of Asset
Management

CWEA

Benefits of a Phased Approach

- Efficient use of District resources
- Ability to refine process for future expansion
- Ability to adjust approach to better suit needs of District staff
- Demonstrate the results in a short period of time
- Staff buy-in and transfer of knowledge

Tools and Technology

- Photographic evidence of condition score
- Increased efficiency
- Reduced time on site by 25%
- Reduced time to transfer and QC data by 25%
- Increased data quality and consistency

Paperless

Condition Scoring Guide

- 1 EXCELLENT**
The physical condition of the asset is new or like-new, well maintained, fully operable, and performs at or above standards.
- 2 GOOD**
Asset is sound, well maintained, delivers full efficiency with little or no performance deterioration, but may show signs of wear.
- 3 AVERAGE**
Asset is functionally sound and may show normal signs of wear relative to age and use, but may have minor failures or performance deterioration. Minor or moderate refurbishment of 10-20% of asset may be needed within next 2 years.
- 4 FAIR**
Asset functions but requires sustained high level of maintenance to remain operational. Substantial wear is visible and likely to cause significant performance deterioration. Refurbishment of 20-40% of asset may be needed within next 2 years.
- 5 POOR**
Asset is very near, or beyond, its useful life. Incapable of performing to a satisfactory standard under normal operational conditions without on-going or corrective maintenance. Replacement needed in the near term (less than 2 years).

360-degree photos will be taken from each facility
